SUBJECT INDEX, VOLUME 2

Acetaldehyde, polymerization of, 4573
Acrylamide in propionamide, polymerization in solid solutions of, 2617
Acrylamidomethyl ether of cotton, free radical-catalyzed reaction of, 2657
Acrylic anhydrides, copolymerization with vinyl monomers, 4835
  polymers derived therefrom, 2385
Acrylic monomers, photosensitized polymerization of, 1539
Acrylonitrile, electroinitiated anionic polymerization of, 865
  methacrylate copolymerization, 2647
  methyl methacrylate copolymerization in a heterogeneous system, 5057
  polymerization in aqueous media, permanganate–oxalic acid as a redox initiator of, 1731
  polymerization in liquid ethylene, 4077
  polymers, coloration in, 1567
  styrene copolymerization, 3649
Aldehydes, higher, polymerization of, 4591, 4607, 4621, 4633, 5337
Alkyl methacrylates, effect of alkyl group on radical polymerization of, 2901
Aliphatic aldehydes, poly(methylene acetals) derived from, 2489
N-Allylacetamide, homopolymerization of, 3909
Allylbenzene, cationic isomerization polymerization of, 5171
Allylic compounds, polymerization studies on, 1355
N-Allylstearamide, homopolymerization of, 3909
Amides, oligomeric, 2151
Amorphous polymers, viscosity of, 3585
Amylose V complexes, 2705
  from 2-aminoethanol solutions, 4765
  from dimethyl sulfoxide solutions, 4757
  low molecular weight primary alcohols, 1085
Amylose crystals, chain folding in, 4503
Anionic polymerization, acrylonitrile, electroinitiated, 865
  octamethylcyclotetrasiloxane in tetrahydrofuran solution, 523
Anionic polymers, a study of the statistical character of, 4583
Aromatic polyamides, structure and properties studies, 253
Association phenomena in carboxyl-containing polymers, 4683
Asymmetric chain growth in polymerization, probability theory of, 3681
Atactic poly-1-pentene, thermodynamic parameters for, 3075
Autoxidation, of cellulose, 225
Aziridines, polymerization behavior with 1,2-epoxides, 2481; *erratum*, 4260
Benzene, polymerization by ferric chloride, 1193
Benzoyloxy radical, relative reactivities of esters towards, 1893
Bicyclo-(2.2.1)-hepta-(2.5)-diene (Norbornadiene), free radical polymerization and copolymerization of, 4105
Birefringence, dynamic, rheo-optical properties of polymers, 931
  in irradiated polyethylene, temperature depencence of, 1463
Bis(imidazolato)–metal polymers, 1839
Bisphenol A, distribution of molecular weight and of branching in high molecular weight polymers from, 2631
  polycarbonate, some elastic moduli of, 4889
Bivalent counterion and polymethacrylic acid, interaction of, 3771
Blending, effect on the molecular weight distribution of polymers, 2977
Block copolymers, preparation and properties of, 417
Bornyl methacrylate, polymerization and copolymerization of, 1407
Butadiene polymerization, in the presence of triethylaluminum and *n*-butyl titanate, 3029
1,3-Butadienes, 2-substituted-, stereospecific polymerization of, 4261
2-*tert*-Butyl-1,3-butadiene, crystalline polymers of, 4261
tert-Butyl crotonate, polymerization of, 4551
Butyllithium, heterophase polymerization with 4-vinylpyridine, 2245
Butyl rubbers and dicumyl peroxide, reaction between, 2127
ϵ-Caprolactam, polymerization, molecular weight distribution, and viscosity of multichain polymers in, 1501
Carbodiimides, polymerization of carbon–nitrogen double bond in, 3901
Carbon monoxide–formaldehyde copolymers, preparation and structure of some, 5203
Carbon–nitrogen double bond in carbodiimides, polymerization of, 3901
Carborane polymers, 3113, 3135
Carboxyl-containing polymers, association phenomena in, 4683
Catalyst depletion or deactivation, influence on polymerization kinetics, 3885
Cationic polymerization, 3-methylbutene-1 at extremely low temperatures, 381
  3-methyl-butene-1 at moderately low temperatures, 367

Cellulose, autoxidation of, 225
comparison of effects of allylamine and *n*-propylamine on, 2951
effect of chemical reagents on fine structure of, 3933
kinetic study of autoxidation of, 2063
mechanism of mechanical degradation of, 973
photolysis of, 81
Centrifugation, density gradient, analysis of copolymers by means of, 4053
of a graft copolymer, 4047
Chain entanglements, polybutadiene networks, 277
Chain folding, in amylose crystals, 4503
Chain polymers, random degradation of, 1341
Chains, deformation of networks of very stiff random, existing in certain colloidal gels, 4931
non-Gaussian, anisotropic elasticity of composite molecular networks formed from, 1025
Chelates, metal, of polyhydrazides, 1825
1-Chloronaphthalene and 1,2,3,4-tetrahydronaphthalene, comparison of polyethylene molecular weights determined by light-scattering measurements in, 4875
Chromatography, gel permeation, a new method for molecular weight distribution of high polymers, 835
Coiling type polymers, dimensions of, 289
Cold-drawing, of acetone-crystallized polyethylene terephthalate, 1043
of polyethylene, fine texture in necking portions of, 1955
Coloration in acrylonitrile polymers, 1567
Conformational changes in polyvinyl chloride, infrared studies of, 669
Copolymers, analysis by means of density gradient centrifugation, 4053
Copolymerization, correlation of data in, 4207
in electron-donor solvents with organolithium catalysts, 2685
equations, expanded, proof of validity of, 3633
models, distinction between terminal and penultimate, 1687
reactivity parameters, calculation from product probabilities, 4181
reactivity ratios, prediction of, 4201
ring-scission, kinetics of, 4151
styrene and *p*-methylstyrene, 4231
Copper, effect on autoxidation of cellulose, 225
Cotton, free radical-catalyzed reaction of the acrylamidomethyl ether of, 2657
Counterions, bivalent, and polymethacrylic acid, interaction of, 2883
Crazes, refractive indices and compositions in several glassy polymers, 4159
Crosslinkages, covalent acid labile, wool, 149
wool fibers, 131
Crosslink formation, study by partial conversion properties, 5111
Crystallization, polymer, the effect of simultaneously occurring processes on, 4059
p-Cyanostyrene–styrene copolymers, preparations and reaction of, 503
ω-Cyanothiaalkyl polyacrylates: a new class of synthetic rubbers, 1941
1,3-Cyclohexadiene, copolymerization with isoprene, 3297
polymers, 3277, 3297
1,4-Cyclohexanedimethanol, polyesters of, 2115
Cyclohexyl, cyclopentyl groups, polymers containing, 4461
cis,*cis*-1,5-Cyclooctadiene and sulfur dioxide, thermal stability of the copolymer of, 4031
4-Cyclopentene-1,3-dione, copolymerization with acrylonitrile and methyl methacrylate, 4475
Cyclopentyl and cyclohexyl groups, polymers containing, 4461
Cyclopolymerization, 4825, 4835
diepoxides, 405
Deformation, networks of very stiff random chains existing in certain colloidal gels, 4931
polymer, 3813, 3835, 3857
Degradation, 689, 4941
poly *n*-butyl methacrylate, 983
polyoxypropylene glycol–toluene diisocyanate polymers, 689
N-substituted polycarbamates, 1
Density, polyethylene, 1301
Deuteration, effects upon the photolysis of cellulose, 91
proteins and polyamides in deuterium oxide vapor, 5161
1,5-Diamino-2,4-alkylenetrisilazanes, preparation and polymerization of, 45
Diazonium coupling, polymer formation through, 1925
Dicarboxylic acids from butadiene, isoprene, and styrene, 2571
Dicumyl peroxide and butyl rubbers, the reaction between, 2127
Diels-Alder polymerization, 1487
post-modification of conjugated triene polymers via, 5305
Diene polymerization, stereoregular, with inorganic catalysts, 3233, 3257
Diene polymers, cyclo-and cyclized, 3969, 3987
Diepoxides, cyclopolymerization of, 405
Diethyl phosphonoalkyl acrylates, copolymerization of, 1017
Differential flow dichroism of polymer solutions, instrument for studies of, 853
Diffusion, column thermal, as a means of polymer characterization, 611; *erratum*, 4260
gaseous, through polymers, an interpretation using fluctuation theory, 1001
gases through polymer films, linear free energy relationship in, 957
multicomponent non-Fickian, through

inhomogenous polymer membranes, 1115
vapors in ethylene–propylene copolymers, 341
Dihydrohalogen polymerization, new reaction, preparation of polyconjugated systems by, 2783
Dihydroxymethylxylitol, polyesters and polyurethanes of, 1833
Diisocyanate-linked elastomers, crosslinked and noncrosslinked, containing substituted urea groups, 539
2,5-Dimethoxystyrene, polymerization behavior of, 2409
N,*N*-Dimethylethenesulfonamide, γ-irradiation and radical-initiated polymerization of, 3327
4,4-Dimethyl-1,6-heptadiene-3,5-dione, synthesis and cyclopolymerization of, 5123
5,7-Dimethyl-1,6-octadiene, homopolymers and terpolymers of, 4415
Diolefins, nonconjugated, copolymerization of, 5277
Diphenylsiloxanes, chlorinated, polymerization of, 4011
Diphenyl-*p*-styrylphosphine, synthesis, polymerization, and copolymerization of, 1241
2,5-Diphenylthiazolo 5,4-*d* thiazole moiety, polymers containing, 257
Diphenylvinylphosphine oxide, x-ray-induced polymerization of, 4087
Divalent ion binding by polyelectrolytes, on the theory of, 4661
Divinylacetal of (R)(+)-3,7-dimethyloctanal, cyclopolymerization of, 3491
Divinylbenzene, copolymerization with monovinyl monomers, 4809
isomers, kinetics of polymerization of, 5347
mixtures, analytical and preparative vapor-phase chromatographic separation of, 3153
Elastic behavior, polybutadiene networks, 277
Elasticity, anisotropic, of composite molecular networks formed from non-Gaussian chains, 1025
rubber, highly crosslinked polyesters, 1587
highly crosslinked polyethyl acrylate, 1595
highly crosslinked systems: crosslinked styrene, methyl methacrylate, ethyl acrylate, and octyl acrylate, 2749
preswollen polymer networks, lightly crosslinked vinyl–divinyl systems, 2513
thermodynamic properties of deformed networks, 5039
Elastic moduli, bisphenol A polycarbonate, 4889
Elastomers, crosslinked and noncrosslinked diisocyanate-linked, containing substituted urea groups, 539
Electrochemical transformations of polymeric acid solutions, 5187
Electron exchange polymers, 2401, 2409, 3603
Electron radiation of aqueous methyl cellulose solutions, 4921
Electron transfer polymers, 4647
Emulsion copolymerization, halogenated olefins, 1863
Emulsion polymerization, styrene, 711
Energy, linear free, relationship in the diffusion of gases through polymer films, 957
Epichlorohydrin, distribution of molecular weight and of branching in high molecular polymers from, 2631
Episulfide, sugar, ring-opening polymerization of, 2595
Epoxidation, poly-2-methyl-6-allyl-1,4-phenylene oxide and copolymer of 2-methyl-6-allyl-4-bromophenol and 2,6-dimethyl-4-bromophenol, 4425
1,2-Epoxides, polymerization behavior with aziridines, 2481
Epoxy compounds, study of, 3405
Epoxy resin and acid anhydride, curing reactions with amine, acid, alcohol, and phenol as catalysts, 3405
1,2-Epoxypropyl-2,3,4,6-tetra-O-acetyl-β-D-glucopyranoside, preparation and polymerization of, 2555
Equilibrium polymerizations, molecular weight distributions in, 1121
Equilibrium sorption of ethylene–propylene copolymer vapors, 333
Equilibrium two phases of polymer–solvent mixture systems, compositions in, 965
Ethyl acrylate, rubber elasticity in, 2749
Ethylene copolymerization with tetrafluoroethylene induced by ionizing radiation, 1977
general conclusions about the copolymerization with other monomers by free radical catalysis, 3623; *erratum*, 5028
1,5-hexadiene, copolymers, 4973
homopolymer in ethylene–propylene copolymers, detection of, 705
kinetics of the γ-radiation-induced polymerization in alkyl chlorides, 2503
Ethylene bis(*N*-phenylcarbamate), thermal degradation of, 4773
Ethylene–propylene copolymers, detection of ethylene homopolymer in, 705
diffusion of vapors, 341
equilibrium sorption of vapors, 333
Ethylene–propylene rubber, creep behavior of, 811
interaction parameters and heats of dilution in various solvents, 5267
peroxide crosslinking of, 3053
Ethylenesulfonic acid, a convenient preparation for, 5364
Fatty acids, cyclic and polychloro, preparation and polymerization of vinyl esters of, 2523
Fibers, cellulosic, studies in the kinetics of removal of water from, 943

poly(1,3,4-oxadizole), with high temperature resistance, 1171
stress relaxation in, effect of water and temperature, 3577
Fibrous macromolecular systems, phase changes and associated elasticity, 731
Flocculation, phenomenon of, 785
Fractionation, column elution, of polyoxypropylene glycol–toluene diisocyanate polymers, 689
polymers of higher α-olefins, 2305
Fracture processes in polymeric materials, 4069
Gases, from irradiated polyethylene, analysis of, 2041
nonpolar, solubility in polymers, some new considerations, 1873
Glassy polymers, refractive indices and compositions of crazes in several, 4159
Glucitol, polyesters and polyurethanes of, 1833
Glucosides, methyl, mono-, and methyl di-O-allyl-α-D, and their polymerization, 2471
Glycine ethyl ester, catalytic polymerization of, 1493
α,ω-Glycols, from butadiene, isoprene, and styrene, 2571
from isobutylene and some derived block copolymers, 5313
1,2-Glycol units, determination in polyvinyl alcohol, 3673
Graft copolymerization, high pressure, 2875
styrene and methyl methacrylate in very viscous medium, 3197
Graft copolymers, density gradient centrifugation of, 4047
peranhydride side groups, 2423
Guaran, fully acetylated, configuration and hydrodynamic properties of, 4123
Halogen, determination in copolymers by dye-partition technique and calculation of r_1, 1365; *erratum*, 5027
1,5-Hexadiene polymers, 1549, 4973
Hexamethylenediamine–cellulose complex, study of the, 4845
High polymers, cohesive energy density and internal pressure of, 5319
dynamic mechanical behavior of some at temperatures from 6°K., 5075
gel permeation chromatography, a new method for molecular weight distribution of, 835
relation between different morphological forms in, 4339
viscous flow of, 5099
Higher aldehydes, polymerization of, 5337
Homopolymerization of *N*-allylacetamide and *N*-allylstearamide, 3909
Hydration of polyelectrolytes, 907
Hydride shift polymerization, intramolecular, by cationic mechanism, 1441, 2093, 5029
Hydrogen peroxide systems, initiation of, 2807
Hydrophilic polymers, kinetics of sorption of water vapor by, 5327
Infrared studies, chain conformations in polyvinyl chloride, 5355
conformational changes in polyvinyl chloride, 669
microstructures of polychloroprenes, 4735
normal vibration analysis of stereoregulated polydideuteroethylene, 1607
polyhydroxymethylene and deuterated polyhydroxymethylene and deuterated polyhydroxymethylene, 4865
Intrinsic viscosity–molecular weight relations of polystyrene over a broad range in molecular weight, 4533
Iodine–octamethylcyclotetrasiloxane solutions, radiation chemistry of, 3781
Ion binding of polyelectrolytes, 907
Ion-exchange resins, rapid characterization by NMR, 1331
Ionizing radiation, main-chain degradation and thermal stabilization of polyoxymethylene by, 239
Irradiation, polyethylene crystals: gas evolution studies of, 3067
Isobornyl methacrylate, polymerization and copolymerization of, 1407
Isobutene, copolymerization with isobutene induced by ionizing radiation, 2445
Isocyanates, polymers and copolymers of vinyl pinolate and some reactions with, 5047
Isomorphism in copolyamides containing the *p*-phenylene linkage, 4289
Isoprene, copolymerization with 1,3-cyclohexadiene, 3297
polymerization with normal-, iso-, secondary, and tertiary butyllithium, 2827
p-Isopropylstyrene, polymerization and copolymerization with styrene in liquid sulfur dioxide, 3355
Isotactic poly-1-pentene, thermodynamic parameters for, 3075
Isotherms, nitrogen adsorption, on polyolefins, 1647
Ketones, lower molecular weight, 2705
Kinetics, acid hydrolysis of poly- and oligosaccharides, some considerations of the, 2373; *erratum*, 1024
acrylamide polymerization in the absence of oxygen, 1539
autoxidation of cellulose suspended in sodium hydroxide solution, 2063
catalyst depletion or deactivation influence on polymerization, 3885
divinylbenzene isomers polymerization, 5347
methacrylic anhydride polymerization, 4825
molten trioxane polymerization, 3431
nonstationary-state, of vinyl polymerization, some considerations on, 3103
photopolymerization of tetraethylene glycol dimethacrylate, 69
polymerization in the presence of oxygen, 1069
polymerization of α,*d*-styrene and/or

styrene by homogeneous catalysis, 4113
γ-radiation-induced polymerization of ethylene in alkyl chlorides, 2503
ring-scission copolymerization, 4151
sorption of water vapor by hydrophilic polymers, 5327
styrene polymerization, 3203
water removal from cellulosic fibers, studies in, 943
Kishi lag times of O_2 adsorption onto irradiated poly(bisphenol-A carbonate and poly(methyl methacrylate), 5213
Kolbe synthesis, crossed, 5187
Latex particles, chemically heterogeneous, fractionation by centrifugation, 1633
copolymer, chemically heterogeneous populations of, 4719
Latices, mechanism of film formation from, 785
Lattice modes of polyethylene, 3523
Light-scattering, for study of linear polyethylenes, 167
instruments, calibration of the volume content, 303
photometers, the use of Syton 2X colloidal silica as a calibration medium for, 2025
study of the oxidative degradation of polystyrene, 1205
Linear condensation polymers from phenolphthalein and related compounds, 437; *erratum*, 4707
Lithium forms of poly(vinyl methyl ether–maleic acid), 5327
Long chain compounds with reference to the possibility of chain folding, 2151, 2171
Mean square length of random polypeptide chains and the length of protein fibers, 123
Melts, packing density near the glass transition temperature, 3159
Membrane potentials, measurement of and test of theories, 4491
Mercaptans in emulsion polymerization, apparent transfer constants of, 4911
Metal sulfate–sulfuric acid complex catalysts, stereoregular polymerization of vinyl alkyl ethers with, 3369
Menthyl methacrylate, stereospecific polymerization of, 3339
Methacrylamide, electron spin resonance studies of irradiated single crystals of, 2207
Methacrylic acid, ester of reactivities of, 1893
polymerization of butyl esters of, and hydrolysis of the polymers, 1105
Methacrylic anhydrides, copolymerization with vinyl monomers, 4835
kinetics of polymerization of, 4825
Methacrylonitrile, anionic polymerization and oligomerization by alkali metal alkoxides, 4743
Methane, diffusivities and solubilities in linear polyethylene melts, 3925
3-Methylbutene-1, extremely low temperature polymerization, 381
moderately low temperature polymerization, 367
Methyl cellulose solutions, aqueous, electron radiation of, 4921
Methyl methacrylate, aqueous polymerization initiated by salts or complexes of some metals in their higher oxidation states, 2817
continuous copolymerization with acrylonitrile in a heterogeneous system, 5057
efficiency and frequency of grafting to granular corn starch, 3721
graft copolymerization with styrene in very viscous medium, 3197
homopolymer, extractability from its graft copolymers with starch, 3733
kinetics and mechanism of the trialkylboron-catalyzed polymerization in the presence of oxygen, 4215
radiation-induced copolymerization with acrylonitrile, 2647
rubber elasticity in, 2749
β-Methylstyrene, cationic isomerization polymerization of, 5171
p-Methylstyrene, ionic copolymerization with styrene, 4231
2-Methyl-5-vinylpyridine, radiation-induced polymerization of, 3639
Molecular weight, averages from random chain scission process for wide distribution, evaluation of, 1057
determination by procedure X in stress relaxation, 1523
measurements in polyethylene, effect of temperature on, 1655
polyacrylonitrile glass transition temperature dependence on, 5257
polyethylene, comparison of, 4875
polymethyl methacrylate ultimate properties dependence upon, 4069
poly vinyl chloride, 2017
thermoelectric determination of, 2547
Molecular weight distribution, effect of blending on, 2977
equilibrium polymerizations, 1121
from fractionation data, critical analysis of, 1373
influence on some properties of polystyrene melt, 3557
models, mathematical, proposed for real polymer distributions, 4303, 4329
polymer fractions, a method of estimating, 3451
Monomers, copolymerization, general relationships among, 2735
generality of product probability values in unifying and predicting relationships among, 4169
synthesis of, 2849
Monovinyl monomers, copolymerization with divinylbenzene, 4809
Monte-Carlo calculation of the dimensions of coiling type polymers in solution of finite concentration, 289
Networks, deformed, thermodynamic properties of, 5039
Nitriles, synthesis and electrical conductivity measurements on semi-

conducting organic polymers derived from, 4709
2-Nitroolefins, polymerization of, 5247
Norbornadiene, free radical polymerization and copolymerization of, 4105
Norbornene and derivatives, polysulfones of, 1251
Nuclear magnetic absorption in polystyrene–styrene systems, 2623
Nuclear magnetic resonance, high resolution, stereochemical configurations of polypropenes by, 1815
high resolution, vinylidene chloride–vinyl chloride copolymer, 895
microstructures of polychloroprenes, 4735
rapid characterization, ion-exchange resins, 1331
undecoupled and decoupled high resolution study of polyvinyl chloride, 5221
Nylon 6, polyoxymethylene crystals, drawing of, 3857
sorption and diffusion of water vapor, 2437
α-γ transition of, 2283
Nylon 66, dynamic mechanical behavior at temperatures from 6° K., 5075
unperturbed dimensions of, 3765
Octamethylcyclotetrasiloxane, anionic polymerization in tetrahydrofuran solution, 523
base-catalyzed solution polymerization of, 513
Octyl acrylate, rubber elasticity in, 2749
Olefins, clay-catalyzed reactions of, 1221, 1847, 3203
free-radical polymerization of, 4247
halogenated, emulsion copolymerization of, 1863
α-Olefins, polymers of higher, fractionation of, 2305
Oligomers, linear, of poly *p*-ethylene oxybenzoate having hydroxyl and carboxylic acid endgroups, CH_2 rocking vibrations of, 3665
Optically active polymers: cyclopolymerization of the divinylacetal of (R)(+)-3,7-dimethyloctanal, 3491
Organic diluents, precipitative aqueous polymerization, 1481
sol-phase polymerization, 1471
Oxides, free radical homopolymerization and copolymerization of, 1233
Oxygen, diffusion in gamma-irradiated polyethylene, 4965
Penton, degradation of, 4017
Penultimate and terminal copolymerization models, the distinction between, 1687
Penultimate unit effects in terpolymerization, 4191
Peranhydrides, asymmetric, decomposition of, 2417
side groups, graft copolymerization with, 2423
1-(Perfluoroacyl)aziridines, synthesis and polymerization of, 3803
Peroxide of poly methyl methacrylate and its copolymers, investigations on the radiation-produced, 3305
Persulfate-initiated vinyl polymer by dye techniques, endgroup studies in, 4433, 4441
Phase changes in fibrous macromolecular systems, 731
Phenolic condensation polymers, mechanisms of thermal degradation of, 2859
Phenolic polynuclear compounds with sulfonyl bridges, the preparation of, 4003
Phenolphthalein and related compounds, linear condensation polymers from, 437; *erratum*, 4707
p-Phenylene linkage, isomorphism in copolyamides containing the, 4289
Phosphates, condensed, 3959, 3963
Phosphine oxide, synthesis, polymerization and copolymerization of, 1241
Phosphine sulfide, synthesis, polymerization, and copolymerization of, 1241
Photodegradation of polymethyl acrylate, 2085
Photoelastic properties of tightly cross-linked networks, 769
Photolysis of cellulose in a vacuum with 2537 A. light, 81
Photopolymerization of tetraethylene glycol dimethacrylate, kinetics of, 69
Photosensitivity, poly vinyl cinnamate, some aspects of, 2907
Photosensitized polymerization of acrylic monomers, 1069, 1539
Piperazine polyurea and polyamide, study of the preparations by low temperature solution polymerization, 5149
Polyacetaldehyde, elastomeric, tacticity of, 5337
Polyacrylates, association of organic quaternary ammonium cations with, 2771
Polyacrylic acid, and polyethylene oxide in aqueous solution, some factors affecting the molecular association of, 845; *erratum*, 2975
Polyacrylonitrile, dependence of the glass transition temperature on molecular weight, 5257
Polyacrylonitrile gel, effect of molecular weight and its distribution on stretching of, 313
Poly-*n*-alkyl acrylates, γ-irradiated, cross-linking and degradation in, 57
Polyamide copolymers, radiation-induced electrical conductivities in, 4097
Polyamides, deuteration in deuterium oxide vapor, 5161
dilute solution properties in formic acid, 3755
low temperature solutions polycondensation preparation, 2693
piperazine, amine acid-acceptors for the preparation by low-temperature solution polycondensation, 209
low temperature solution polycondensation of, 181
Polyamine, poly xylylenylpiperazine, novel, 2673
Polyarylene sulfides, preparation of, 1511

Polybenzimidazoles, 4795, 2559
Poly(bicyclo[2.2.]heptadiene-2,5), *erratum*, 5027
Poly-3,3-bis(chloromethyl)oxacyclobutane, degradation of, 4017
Poly(bisphenol-A carbonate), irradiated, Kishi lag times for O_2 adsorption onto, 5213
Polybutadiene networks, chain entanglements and elastic behavior of, 277
Polybutadienes, rheological properties of, 797
Polybutene-1, dynamic mechanical behavior at temperatures from 6°K., 5075
Poly-*n*-butyl methacrylate, hydrodynamic properties and statistical coil dimensions of, 4039
Poly-*n*-butyl methacrylate, thermal and photochemical degradation of, 983
Poly-*N*-*tert*-butylacrylamide in methanol, determination of a Mark-Houwink type relationship for, 3615
molecular configuration and hydrodynamic behavior of, 4517
Polycarbamates, *N*-substituted, thermal degradation of, 1; *erratum*, 3812
Polycarbonate, studies on the thermal stability of, 2859
degradation of, 4787
Polychloroprenes, infrared and nuclear magnetic resonance studies of the microstructures of, 4735
Polychloroprene vulcanizate, stretched, diffraction study of crystallite orientation in, 4391
cis-Polychloroprene, 4727
Polyconjugated systems, preparation by new reaction of dihydrohalogen polymerization, 2783
Poly-1,3-cyclohexadiene, preparation and aromatization of, 3277
Polydideuteroethylene, steroregulated, infrared spectra and normal vibration analysis, 1607
Poly-*m*-diethynylene benzene, thermal degradation of, 2217
Polydimethylsiloxane, random and block copolymers of, 31
Polydiphenyldiacetylenes, synthesis and properties of, 2849
Poly-1,2-dimethyl-5-vinylpyridinium methyl sulfate, polymerization studies, 2191
Polyelectrolytes, hydration and ion binding of, 907
salt solutions, 5287
theory of divalent ion binding by, 4661
Polyepoxide monomers, statistical theory of the polymerization of, 3743
Polyesters, 1,4-cyclohexanedimethanol, 2115
highly crosslinked, rubber elasticity in, 1587
polycondensation low temperature solution preparation, 2693
Polyether-ester copolymer prepared from *p*-γ-hydroxypropoxy benzoate and bis-β-hydrozyethyl terephthalate, 4361
Polyethyl acrylate, highly crosslinked, rubber elasticity in, 1595
Polyethyl methacrylate, dynamic mechanical behavior at temperatures from 6°K., 5075
Polyethylene, birefringence temperature dependence, 1463
cold-drawn, fine texture in necking portions of, 1955
crystallization from *o*-xylene, 2759
density of, 1301
drawing of single crystals, 3813
drawn, annealing of single crystals and fibers, 3835
dynamic mechanical behavior at temperatures from 6°K., 5075
electron spin resonance of, 219
γ-irradiated, diffusion of oxygen in, 4965
γ-radiation-induced changes in the structure of, 2455
gas evolution studies, 3067
gases evolved from, 2041
lattice modes of, 3523
linear, scattered-light study of, 167
melt crystallization under elevated pressure, 3697
melts, linear, diffusivities and solubilities of methane in, 3925
molecular weights, comparison of, 4875
morphology of, crystallized from the melt under pressure, 3707
resins, molten, elastic effects and extrudate distortions in capillary flow of, 3791
x-ray line broadening origins in single crystals, 2947
Polyethylene fumarate and styrene, copolymerization of, 5111
Polyethylene oxide, chain length, 2171
complex with mercuric chloride, 2499
and polyacrylic acid in aqueous solution, some factors affecting the molecular association of, 845; *erratum*, 2975
Polyethylene–polyfunctional monomer mixtures, radiation crosslinking of, 2835
Polyethylene oxybenzoate, CH_2 rocking vibrations of, 3657
Polyethylene terephthalate, acetone-crystallized, cold-drawing of, 1043
Poly-1,5-hexadiene, structure and properties of, 1549
Polyhydrazides, aliphatic, a new low temperature solution polymerization, 1137
aromatic, a new class of highly bonded, stiff polymers, 1147
cyclode-hydration of, 1157
metal chelates of, 1825
Polyhydroxymethylene, deuterated polyhydroxymethylene, an infrared study of, 4865
Polyisobutene, radiolysis of, 1699, 1713, 1721
Polyisobutylene, free volumes in, 1095

Polyisobutyl methacrylate, dynamic mechanical behavior at temperatures from 6°K., 5075
Polymer formation through diazonium coupling, 1925
Polymer fractions, a method of estimating molecular weight distributions of, 3451
Polymeric acid solutions, electrochemical transformations of, 5187
Polymeric materials, fracture processes in, 4069
Polymerization, coupled vinyl and acetal ring-opening, 3471
homogeneous anionic, 3311
kinetics in presence of oxygen, 1069
linear condensation, in a dispersed medium, 2275
probability theory of asymmetric chain growth in, 3681
thermochemistry of, 3095
Polymer network theories, applicability to gels obtained by crosslinking a polymer in solution, 4367
Polymers, air-water interface, 1669
electron transfer, 4647
heats of mixing with ester and ether solvents, 5177
semiconducting organic, derived from nitriles, synthesis and electrical conductivity measurements on, 4709
synthesis of new, 2849
trifunctional, randomly branched, some calculations of intrinsic viscosity and molecular weight distribution for, 4453
Polymer solutions, dilute, experimental data on, 4039
Polymer–solvent interaction parameters and creep behavior of ethylene–propylene rubbers, 811
Polymer–solvent mixture systems, compositions in equilibrium two phases of, 965
Polymer synthesis of chain having conjugated unsaturated bonds, 3347
Polymer systems, temperature-independent viscosity characteristics of, 2357
Polymethacrylic acid, and bivalent counterions, interaction of, 2883, 3771
potentiometric behavior of, 1879
Polymethacrylic anhydride, structure of, 4825
Polymethacrylonitrile, stereoregularity of, 3333
Polymethyl acrylate, photodegradation of, 2085
spectroscopic analysis of, 2093
Polymethylene acetals, a series of, derived from aliphatic aldehydes, 2489
α,ω-Polymethylene diisocyanates, cyclopolymerization of, 3387
Poly-γ-methyl-L-glutamate, negative spherulite of, and effect of aging polymer solution on spherulite growth, 2349
Polymethyl methacrylate, copolymers, investigations on the radiation-produced peroxide of, 3305
dependence of the ultimate properties on molecular weight, 4069
dynamic mechanical behavior at temperature from 6°K., 5075
fracture surface layers, refractive index and composition of, 4165
high conversion, branching in, 1393
irradiated, Kishi lag times for O_2 adsorption onto, 5213
Poly-4-methylpentene-1, dynamic mechanical behavior at temperatures from 6°K., 5075
Polymethyl vinyl ethers, proton resonance spectra and tacticities of some, 1901
Poly-3-methylbutene-1, introduction and structure analysis of, 1441
Polyolefins, nitrogen adsorption isotherms on, 1647
Polyorganosilazanes, 3179
Poly-1,3,4-oxadiazole fibers: new fibers with superior high temperature resistance, 1171
Poly-1,3,4-oxadiazoles: a new class of polymers by cyclodehydration of polyhydrazides, 1157
Poly-1,3,4-oxadiazolidine, 1181
Polyoxetanes, glass transitions of, 5017
Polyoxymethylene, irradiated polyoxymethylene, some aspects of thermal decomposition of, 3461
main-chain degradation and thermal stabilization by ionizing radiation, 239
nylon 6 crystals, drawing of, 3857
Polyoxypropylene glycol–toluene diisocyanate polymers, column elution fractionation and thermal degradation of, 689
Polypeptide chains, random, mean square length of, 123
Polyphenylenebenzimidazoles, 2605
Polypropenes, sterochemical configurations by high resolution nuclear magnetic resonance, 1815
Polypropylene, dynamic mechanical behavior at temperatures from 6°K., 5075
electron spin resonance studies of irradiated, 1275
inhibition of the copper-catalyzed oxidation of, 587
Poly-*d,l*-propylene oxide, dynamic mechanical behavior at temperatures from 6°K., 5075
Polyquinoxalines, 3867
Polystyrene, free volumes in, 1095
light-scattering study of the oxidative degradation of, 1205
low molecular weight, synthesis by anionic techniques and intrinsic viscosity–molecular weight relations over a broad range in molecular weight, 4533
Polystyrene melt, the influence of molecular weight distribution on some properties of, 3557
Polystyrene–styrene systems, nuclear magnetic absorption in, 2623
Polystyrenesulfonates, tracer diffusion,

electrical conductivity, and viscosity of aqueous solutions of, 2917
Polystyryllithium, reaction with carbon dioxide, 4545
Polysulfonamides, preparation by low temperature polycondensation, 2693
Polysulfonates, aromatic, preparation and properties, 1051
Polysulfones of norbornene and derivatives of, 1251
Polytetrafluoroethylene, effect of gamma radiation on the specific volume from −80° C. to +40° C., 4673
pyrolysis of, 391
Polytetramethyl-*p*-silphenylene-siloxane, preparation and properties of, 15
random and block copolymers of, 31
Poly-*s*-triazinyleneimides, synthesis and characterization of, 4989
Polyurethanes, preparation by low temperature solution polycondensation, 2693
Polyurethane sulfides containing a cyclohexane ring in the polymer chain, 881
Polyvinyl acetate-C^{14}, adsorption on smooth, geometrically simple surfaces, 4697
Polyvinyl acetate–diluent systems, diffusion and viscosity of, 1421
Polyvinyl alcohol, determination of 1,2-glycol units in, 3673
dilute solution properties of partly urethanized, 3545
stereoregularity, 2327
Polyvinyl alkyl ethers, glass transformation temperatures of, 4559
Polyvinyl alkyl sulfides, glass transformation temperatures of, 4559
Polyvinyl chloride, dynamic mechanical behavior at temperatures from 6° K., 5075
infrared studies of chain conformations in, 5355
infrared studies of conformational changes in, 669
molecular weight of, 2017
stabilization, the chemistry of, 1765, 1785, 1801
thermal decomposition of model compounds of, 3505, 3515
undecoupled and and decoupled high resolution nuclear magnetic resonance study of, 5221
viscoelastic behavior at large deformations, 1909
Polyvinyl cinnamate, some aspects of the photosensitivity of, 2907
Polyvinylcyclobutane, crystalline, synthesis of, 755
Polyvinylcycloheptane, crystalline, synthesis of, 755
Poly vinyl methyl ether–maleic acid, potassium and lithium forms of, 5327
Poly-2-vinylphenothiazine, preparation and properties of, 3603
Poly-*m*-xylylene adipamide, structural elucidation of, 253
Polyxylylenylpiperazine, a novel polyamine, 2673
Potassium forms of polyvinyl methyl ether–maleic acid, 5327
Potentiometric behavior of polymethacrylic acid, 1879
Price-Alfrey q and ϵ parameters, nature of, 1321
Propagation, alternating inter-intramolecular, general kinetics, 4815
Propylene, copolymerization with styrene, 3009
radiation-induced copolymerization with tetrafluoroethylene at low temperature, 2235
Protein fibers, length of, 123
Proteins, deuteration in deuterium oxide vapor, 5161
Proton relaxation in vinyl polymers, effects of swelling on, 2963
Pyrolysis of polytetrafluoroethylene, 391
Radiation crosslinking of polyethylene–polyfunctional monomer mixtures, 2835
Rate constants, evaluation from thermogravimetric data, 3147; *erratum*, 5027
Rayon, x-ray diffraction and infrared spectra studies on the fine structure of, 461
Reactions, product distribution of consecutive competitive second-order, 1281
Reactivity ratios, copolymer, an example of nonlinear estimation, 645; *erratum*, 3812
Resins, unsaturated polyester, redox polymerization of, 2713, 2721, 2729
Rheological properties of polybutadienes, 797
Rheo-optical properties of polymers, 923, 931
Rubbers, synthetic, a new class of, 1941
Saccharides, poly- and oligo-, some considerations of the kinetics of the acid hydrolysis of, 2373
Salicylaldehyde–formaldehyde polymers and their metallic chelates, 4903
Semiconductors, some organic, carriers and unpaired spins in, 2787
Silica, Syton 2X colloidal, use as a calibration medium for light-scattering photometers, 2025
Solid-state polymerization, topochemical control of, 2181
Sorption, organic vapors slightly above their glass transition temperatures, effect of film thickness upon, 679
water and alcohols by wool, proton magnetic resonance study, 3191
water vapor by hydrophilic polymers, kinetics of, 5327
Spherulites, growth of two dimensional polyethylene, 1291
negative, of poly-γ-methyl-L-glutamate and effect of aging polymer solution on spherulite growth, 2349
Stereoregularity, polymethacrylonitrile, 3333
polyvinyl alcohol, 2327
Stress relaxation, fibers: effect of water and temperature, 3577

procedure X, determination of molecular weights of polymers by, 1523
Styrene, acrylonitrile copolymerization, 3649
crosslinked, rubber elasticity in, 2749
derivatives containing nitrile groups in the side-chain, copolymerization of, 105
dimer solutions up to high polymers and other systems, 1257
effect of liquid dioxide concentration on cationic copolymerization with methyl acrylate in liquid sulfur dioxide, 4271
emulsion polymerization of, 711
graft copolymerization with methyl methacrylate in very viscous medium, 3197
ionic copolymerization with *p*-methylstyrene, 4231
kinetics of polymerization of, 3203
p-methylstyrene, ionic copolymerization of, 4231
polyethylene fumarate, copolymerization of, 5111
polymerization, 1221
in *N,N*-dimethylformamide and *N,N*-dimethylacetamide, 3169
with $TiCl_3$–$Al(C_2H_5)_3$ and VCl_3–$Al(C_2H_5)_3$ catalysts, 5131
propylene, copolymerization of, 3009
unsaturated esters copolymerization, 2135
α,d-Styrene, styrene, kinetic study of the polymerization by homogeneous catalysis, 4113
Styrene–maleic acid copolymer, conformation in aqueous HCl solutions, 5239
Styrenes, substituted, absolute propagation rate constants for the radical polymerization of, 2049
Sulfamide, evaluation and structure of polymers from, 489
preparation of polymers from, 481
Sulfides, desyl aryl, use as photoinitiators, 69
free radical homopolymerization and copolymerization of, 1233
polyarylene, preparation of, 1511
Sulfonyl bridges, preparation of phenolic polynuclear compounds with, 4003
Sulfur, elemental, as a plasticizer for polysulfide polymers and other polymers, 1987
influence in the side chain of thiaalkyl polyacrylates, 1185
Sulfur dioxide, *cis,cis*-1,5-cyclooctadiene, thermal stability of the copolymer of, 4031
liquid, polymerization in, 3355, 3877, 4271, 4281
Tacticity, elastomeric polyacetaldehyde, 5337
polymethyl vinyl ethers, 1901
Temperature, effects upon the photolysis of cellulose, 91
Temperature coefficient unperturbed dimensions from solution properties, 3083
unperturbed polymer dimensions from thermoelastic properties, 3089
Terminal and penultimate copolymerization models, the distinction between, 1687
Terpolymerization, penultimate unit effects in, 4191
1,3,6,8-Tetraazopyrene, 2,7-disubstituted, and related polymers, 5005
Tetraethylene glycol dimethacrylate in the bulk, kinetics of photopolymerization with use of desyl acryl sulfides as photoinitiators, 69
Tetrafluoroethylene, copolymerization with ethylene induced by ionizing radiation, 1977
copolymerization with isobutene induced by ionizing radiation, 2445
radiation-induced copolymerization with propylene at low temperature, 2235
Thermochemistry of polymerization, 3095
Thiaalkyl polyacrylates, influence of sulfur in side chain, 1185
Time-temperature equivalence, inadequacies in, 3951
Trienes, conjugated, polymerization of, 5291
postmodification via the Diels-Alder reaction, 5305
α-Trifluoromethyl vinyl acetate, 1641
Trioxane, initiation of bulk polymerization of ^{c}, 3443
kinetics of polymerization of, 3431
solid state, radiation-induced post polymerization of, 2929
Urea groups, crosslinked and noncrosslinked diisocyanate-linked elastomers containing, 539
Vinyl acetate-diphenyl, the polymerizing system, 2297
p-Vinylacetophenone–styrene copolymers, some reactions of, 823
Vinyl alkyl ethers, stereoregular polymerization with metal sulfate–sulfuric acid complex catalysts, 3369
9-Vinylanthracene, cationic polymerization of, 2533
Vinylbis-1-ethoxyethyl hydroquinone, preparation and polymerization of, 2401
Vinylcyclohexane, cationic isomerization polymerization of, 5029
Vinyl–divinyl systems, lightly crosslinked, rubber elasticity of preswollen polymer networks, 2513
Vinyl esters of cyclic and polychloro fatty acids, preparation and polymerization of, 2523
Vinylidene chloride–vinyl chloride copolymer, high resolution NMR study of, 895
structure of, 1749
Vinyl monomers, copolymerization of acrylic and methacrylic anhydrides with, 4835
emulsion polymerization of, 357

Vinyl phosphines, free radical homopolymerization and copolymerization of, 1233
Vinyl pinolate, polymers and copolymers of, 5047
Vinyl polymers, effects of swelling on proton relaxation in, 2963
incorporation of hydroxyl endgroups in, 2807, 2817
persulfate-initiated by dye techniques, endgroup studies in, 4433, 4441
Vinyl polymerization, 1407, 2901
some considerations on nonstationary-state kinetics of, 3103
4-Vinylpyridine, heterophase polymerization with butyllithium, 2245
Vinylpyrrolidone, graft copolymerization onto polydimethylsiloxane, 5093
Viral coefficient, second, molecular weight dependence of, 1257
Viscoelastic behavior of plasticized polyvinyl chloride at large deformations, 1909
Viscoelasticity, nonlinear, an elementary theory of, 1311
transformation of mechanical model representations to operator equations, 2001
Viscosity, amorphous polymers, 3585
polymer systems, 2357
Water cocatalysts in the polymerization of benzene by ferric chloride, 1193
Wool, covalent acid-labile crosslinkages in, 149
proton magnetic resonance study of sorption of water and alcohols by, 3191
Wool fibers, crosslinkages in and their relationship to the two-stage supercontraction of wool fibers in solutions of LiBr, 131
X-ray diffraction, infrared spectra studies on the fine structure of rayon improved by high temperature steaming, 461
X-ray line broadening, origins in polyethylene single crystals, 2947
Xylan from wood, crystallographic study of, 627

Copyright © 1964, by John Wiley & Sons, Inc.

Statement of ownership, management, and circulation (Act of October 23, 1962: Section 4369, Title 39 United States Code)

1. Date of filing: September 28, 1964

2. Title of Publication: JOURNAL OF POLYMER SCIENCE

3. Frequency of issue: monthly

4. Location of known office of publication: 20th and Northampton Streets, Easton, Pennsylvania 18043

5. Location of headquarters of general business offices of publisher: 605 Third Avenue, New York, New York 10016

6. The names and addresses of publisher, editor, and managing editor:

Publisher: Eric S. Proskauer, John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016

Editor: Herman Mark, Polytechnic Institute of Brooklyn, 333 Jay Street, Brooklyn 1, New York
Managing Editor: None

7. Owner: John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016
Stockholders owning or holding 1 per cent or more of total amount of John Wiley & Sons, Inc., stock as of September 30, 1964:

Cynthia W. Darby, 23 Farrington St., Newburgh, N. Y.; Maurits Dekker, 511 West 232nd St., Bronx, N. Y.; Rozetta S. Dekker, 511 West 232nd St., Bronx, N. Y.; Julia W. Gilbert, Box 1191, Carmel, Calif.; Edward P. Hamilton, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; Elizabeth W. Hamilton, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; W. Bradford Wiley and Francis Lobdell, Trustees of Elizabeth W. Hamilton Trust, dated 12/23/52, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minn.; Willy Levinger, 336 Central Park West, New York, N. Y.; R. R. Pennywitt, Box 211, Mantaloking, N. J.; R. C. Runyon, Jr., 130 East End Ave., New York 28, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o Deborah Elizabeth Wiley, u/a dated 6/2/58, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; Kate R. Q. Wiley, 1192 Park Ave., New York 28, N. Y.; Edward P. Hamilton, Trustee f/b/o Kate R. Q. Wiley, u/a dated 6/6/38, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o Peter Booth Wiley, u/a dated 6/2/58, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; K. R. Q. Wiley, E. P. Hamilton and Cynthia W. Darby, Executors of the will of W. O. Wiley, c/o E. P. Hamilton, 605 Third Ave., New York 16, N. Y.; Francis Lobdell and William J. Seawright, Trustees f/b/o William Bradford Wiley, 2nd, u/a dated 6/2/58, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; Adele E. Windheim, 8 Dundee Rd., Larchmont, N. Y.; W. Bradford Wiley and E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, u/a dated 12/23/57, c/o John Wiley & Sons, Inc., 605 Third Ave., New York 16, N. Y.; Reing & Co., P. O. Box 491, Church St. Station, New York 8, N. Y.; Eric S. Proskauer and Charles H. Lieb, as Trustees u/a dated 11/27/62, 220 Central Park South, New York 19, N. Y.

8. Known bondholders, mortgagees, and other security holders owing or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None

9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 per cent or more of the total amount of the stock or securities of the publishing corporation.

10. This item must be complete for all publications except those which do not carry advertising other than the publishers own and which are named in Sections 132.231, 132.232, and 132.233, Postal Manual (Sections 4355a, 4355b, and 4356 of Title 39, United States Code)
I certify that the statements made by me above are correct and complete:

Vol. 2, Issue Nos. 1–12

Journal of Polymer Science
Part A: General Papers

ISSUE NO. 1, JANUARY

ELIZABETH DYER and RICHARD J. HAMMOND: Thermal Degradation of *N*-Substituted Polycarbamates 1

ROBERT L. MERKER and MARY JANE SCOTT: Preparation and Properties of Poly(tetramethyl-*p*-Silphenylene-Siloxane) 15

ROBERT L. MERKER, MARY JANE SCOTT, and G. G. HABERLAND: Random and Block Copolymers of Poly(tetramethyl-*p*-Silphenylene-Siloxane) and Polydimethylsiloxane 31

L. W. BREED, R. L. ELLIOTT, and A. F. FERRIS: Preparation and Polymerization of 1,5-Diamino-2,4-alkylenetrisilazanes 45

W. BURLANT, J. HINSCH, and C. TAYLOR: Crosslinking and Degradation in γ-Irradiated Poly-*n*-alkyl Acrylates 57

CONSTANTINE C. PETROPOULOS: Kinetics of the Photopolymerization of Tetraethylene Glycol Dimethacrylate in the Bulk with the Use of Desyl Aryl Sulfides as Photoinitiators 69

JOSEPH H. FLYNN and WILLIAM L. MORROW: Photolysis of Cellulose in a Vacuum with 2537 A. Light 81

JOSEPH H. FLYNN and WILLIAM L. MORROW: Effects of Deuteration and Temperature upon the Photolysis of Cellulose in a Vacuum with 2537 A. Light 91

MOSHE KREISEL, URI GARBATSKI, and DAVID H. KOHN: Copolymerization of Styrene. I. Copolymerization with Styrene Derivatives Containing Nitrile Groups in the Side-Chain 105

W. G. CREWTHER: Mean Square Length of Random Polypeptide Chains and the Length of Protein Fibers 123

W. G. CREWTHER: Crosslinkages in Wool Fibers and Their Relationship to the Two-Stage Supercontraction of Wool Fibers in Solutions of LiBr 131

W. G. CREWTHER: Covalent Acid-Labile Crosslinkages in Wool 149

CARL J. STACY and RAYMOND L. ARNETT: A Scattered-Light Study of Linear Polyethylenes 167

PAUL W. MORGAN and STEPHANIE L. KWOLEK: Low Temperature Solution Polycondensation of Piperazine Polyamides 181

PAUL W. MORGAN and STEPHANIE L. KWOLEK: Amine Acid-Acceptors for the Preparation of Piperazine Polyamides by Low-Temperature Solution Polycondensation 209
R. SALOVEY and W. A. YAGER: Electron Spin Resonance of Irradiated Solution-Crystallized Polyethylene 219
R. I. C. MICHIE and S. M. NEALE: Effect of Copper on the Autoxidation of Cellulose Suspended in Sodium Hydroxide Solution 225
SADAO TORIKAI: Main-Chain Degradation and Thermal Stabilization of Polyoxymethylene by Ionizing Radiation 239
NAOYA YODA and IKUO MATSUBARA: Studies on Structure and Properties of Aromatic Polyamides. I. Structural Elucidation of Poly(*m*-xylylene Adipamide) 253
CHARLES J. FOX: Polymers Containing the 2,5-Diphenylthiazolo-[5,4-d]thiazole Moiety 267
GERARD KRAUS and G. A. MOCZYGEMBA: Chain Entanglements and Elastic Behavior of Polybutadiene Networks 277
SYDNEY BLUESTONE and MARJORIE J. VOLD: Monte-Carlo Calculations of the Dimensions of Coiling Type Polymers in Solutions of Finite Concentration 289
MILTON KERKER, JOSIP P. KRATOHVIL, and EGON MATIJEVIĆ: Calibration of Light-Scattering Instruments. II. The Volume Content 303
HIDEHIKO KOBAYASHI, KIICHIRO SASAGURI, YOSHISATO FUJISAKI, and TOSHIHIKO AMANO: Effect of Molecular Weight and Its Distribution on Stretching of Polyacrylonitrile Gel 313
H. K. FRENSDORFF: Diffusion and Sorption of Vapors in Ethylene–Propylene Copolymers. I. Equilibrium Sorption 333
H. K. FRENSDORFF: Diffusion and Sorption of Vapors in Ethylene–Propylene Copolymers. II. Diffusion 341
RICHARD S. BERGER and E. A. YOUNGMAN: Emulsion Polymerization of Vinyl Monomers by Transition Metal Compounds 357
J. P. KENNEDY, L. S. MINCKLER, JR., and R. M. THOMAS: Cationic Polymerization of 3-Methylbutene-1. I. Polymerizations at Moderately Low Temperatures 367
J. P. KENNEDY: Cationic Polymerizations of 3-Methylbutene-1. II. Polymerizations at Extremely Low Temperatures 381
J. C. SIEGLE, L. T. MUUS, TUNG-PO LIN, and H. A. LARSEN: The Molecular Structure of Perfluorocarbon Polymers. II. Pyrolysis of Polytetrafluoroethylene 391
J. K. STILLE and B. M. CULBERTSON: Cyclopolymerization of Diepoxides 405
M. BAER: Anionic Block Polymerization. II. Preparation and Properties of Block Copolymers 417
P. W. MORGAN: Linear Condensation Polymers from Phenophthalein and Related Compounds 437
SABURO OKAJIMA and KIMIO INOUE: X-Ray Diffraction and Infrared

Spectra Studies on the Fine Structure of Rayon Improved by High Temperature Steaming 461
H. Q. Smith and F. L. Scott: Polymers from Sulfamide. I. Preparation 481
R. A. Florentine, G. Barth-Wehrenalp, I. Mockrin, I. Popoff, and R. Riordan: Polymers from Sulfamide. II. Evaluation and Structure 489
Richard Beckerbauer and Henry E. Baumgarten: Preparations and Reactions of *p*-Cyanostyrene–Styrene Copolymers 503

Issue No. 2, February

Maurice Morton, M. A. Deisz, and E. E. Bostick: Base-Catalyzed Solution Polymerization of Octamethylcyclotetrasiloxane 513
Maurice Morton and E. E. Bostick: Anionic Polymerization of Octamethylcyclotetrasiloxane in Tetrahydrofuran Solution 523
A. J. Havlik and Thor L. Smith: Crosslinked and Noncrosslinked Diisocyanate-Linked Elastomers Containing Substituted Urea Groups 539
R. H. Hansen C. A. Russell, T. De Benedictis, W. M. Martin, and J. V. Pascale: Inhibition of the Copper-Catalyzed Oxidation of Polypropylene 587
David L. Taylor: An Evaluation of Column Thermal Diffusion As a Means of Polymer Characterization 611
Masao Horio and Rikizo Imamura: Crystallographic Study of Xylan from Wood 627
